I believe he is more focus on making money for himself than help other trader to make money. Try to google his name "IR. EKO CAHYONO, MM" you'll get a lot of website made by this person. So he is trully an Internet Marketing Specialist, not a trader.

His EA Based on FREE EA on TSD , StepMA_stochastic with alert , he tweaks parameter and re-sale the EA. I got an Indonesian fellow trader that gets very dissappointed and even share his EA for free, you could get it here (require registration - Indonesian Language).

So everybody... stay away from this EA !
